DOCK BUMPER

LOADING DOCK PROTECTION FROM TRUCKS

Loading docks are high-risk areas. Truck drivers are more likely to make steering mistakes here. This can lead to significant damage to both the truck and the loading dock and gates. You can avoid these high costs by installing our robust, wear-resistant, polymer DOCK BUMPERS at your loading docks.

FLEX IMPACT® DOCK BUMPERS offer superior resistance to wear, cuts, and tears compared to conventional EPDM rubber products. They are reinforced with an integrated galvanized metal plate to absorb the substantial impact from vehicles hitting the loading dock.

DOCK BUMPER BENEFITS:

- Durable design with shock-absorbing fins
- High resistance to abrasion, cuts, and tears
- Built-in galvanized metal plate
- Long lifespan
- No mechanical parts
- Resistant to UV rays, chemicals, and oils
- Only two fasteners
- Quick and easy setup
- Easy to replace (concrete screws, no chemical fixation or anchors required)
