EXTRUSION EXCELLENCE

**PLANT PROTECTION
VITICULTURE & SILVICULTURE**

Celtiplast, a leading specialist in the extrusion of polymer profiles and tubes since 1987.

For many years, we have been developing reliable solutions for professionals in viticulture and silviculture.

We design and manufacture protective sleeves that shield young plants from external threats — including animals, friction and chemical treatments — while creating a microclimate that supports healthy growth.

Durable, easy to install and adapted to real-world field conditions, our sleeves help reduce plant loss and promote stronger, more uniform development — directly contributing to the success of your projects.

Celtiplast, your natural choice for protecting and supporting young plant growth.

WINYTUB

DOUBLE-WALLED SLEEVES
WITH A HONEYCOMB STRUCTURE
FOR OPTIMAL PROTECTION
OF YOUNG VINES

PROTECT AND ENCOURAGE THE GROWTH OF YOUR YOUNG VINES

Winytub is the ideal solution for winemakers who want to protect young plants during their first years of development. Designed to prevent mechanical damage and destruction caused by browsing animals, Winytub also promotes faster and healthier growth by creating a nurturing microclimate.

RELIABLE PROTECTION WHERE IT MATTERS

Young vines are exposed to numerous risks: damage caused by vineyard tools or machinery, herbicides, and browsing rabbits, hares, or deer. Thanks to its robust structure, Winytub effectively protects young plants during their critical development phase.

STIMULATES GROWTH AND FACILITATES MANAGEMENT

By creating a warm and sheltered environment, Winytub supports early growth and promotes better plant development. Lightweight and easy to install, it saves time during planting and is compatible with various types of stakes such as wood, fibreglass, iron or U-shaped stakes.

A PROVEN CHOICE FOR LONG-TERM SUCCESS

Adopted by many winemakers around the world, Winytub offers a sustainable solution that can be reused over several seasons. It guarantees excellent value for money while contributing to homogeneous and vigorous vine growth.

MAIN FEATURES

GROWTH-ENHANCING
Promotes the growth of young vine plants

STAKES
Notches for stakes (also available without notches on request)
Compatible with stakes made of wood, fibreglass or iron

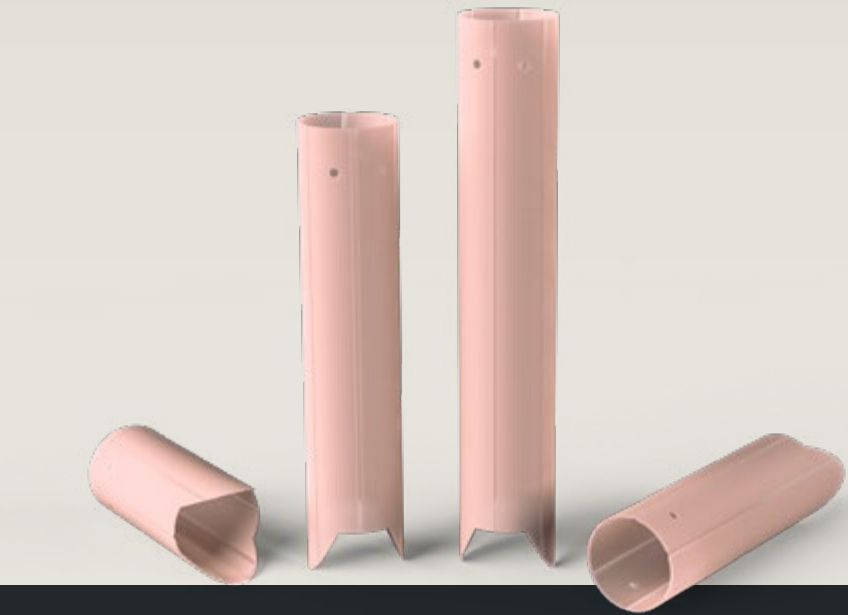

MATERIAL
UV-resistant polyethylene

SERVICE LIFE
4 - 5 years

COLOUR
● Green - ● Chestnut

PACKAGING

Order number	Colour	Height (mm)	Diameter (mm)	Packed in bundles of 25	Units per pallet
DPV0081	●	250	95	240	6,000
DPV0080	●				
DPV0083	●	350		180	4,500
DPV0082	●				
DPV0084	●	450		140	3,500
DPV0086	●				
DPV0085	●	550		120	3,000
DPV0070	●				

Pallet dimensions: 1,000 x 1,200 x 1,700 mm. Weight: 340 kg.

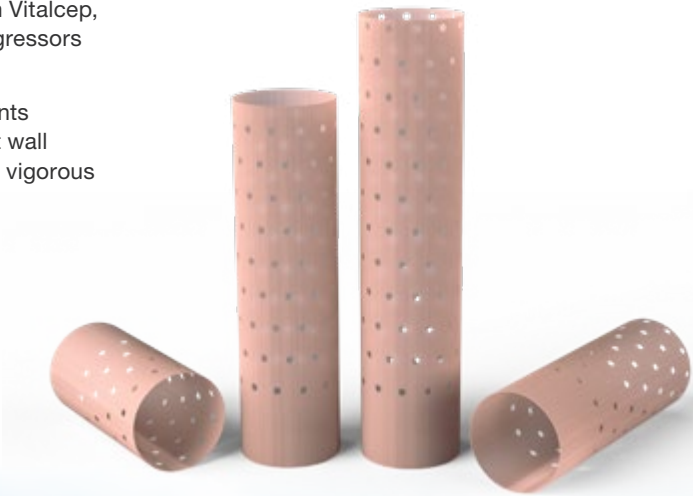

VITALCEP

RIGID SINGLE-WALL PROTECTIVE SHEATHS FOR THE HEALTHY GROWTH OF YOUNG VINES

PROTECT AND ENCOURAGE THE GROWTH OF YOUR YOUNG VINES

Ensure the best conditions for growth for your young vines with Vitalcep, a durable protective sheath that protects them from natural aggressors while stimulating their development.

Made of UV-treated polyethylene, Vitalcep safeguards your plants from rodents and the application of herbicides. The translucent wall creates a microclimate that promotes photosynthesis, enabling vigorous growth from the very first years. Optional perforations optimise the balance of CO2, humidity and temperature.

MAIN FEATURES

GROWTH-ENHANCING
Growth-friendly microclimate thanks to translucency

STAKES
Notches for stakes (also available without notches on request)
Compatible with stakes made of wood, fibreglass or iron

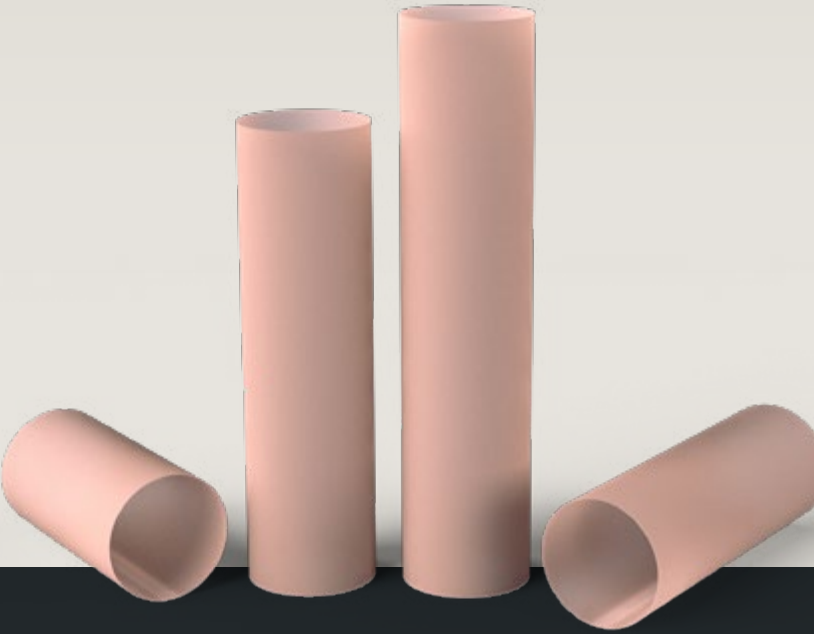

MATERIAL
UV-resistant polyethylene

SERVICE LIFE
3 - 4 years

COLOUR
● Chestnut

PACKAGING

Order number	Model	Height (mm)	Diameter (mm)	Packaged in a cardboard case of	Units/boxes per pallet
DPV0064	Perforated	250	125	500 units	4,000/8
DPV0063	Non-perforated				
DPV0066	Perforated	350		250 units	2,000/8
DPV0065	Non-perforated				
DPV0068	Perforated	450			
DPV0067	Non-perforated				
DPV0103	Perforated	550		200 units	1,600/8
DPV0102	Non-perforated				

8 boxes stacked on a pallet. Pallet dimensions: 1,000 x 1,200 mm. Weight: 130-180 kg.

Sylvitub

HONEYCOMB-STRUCTURED PROTECTIVE TUBES FOR HEALTHY AND SUSTAINABLE GROWTH OF YOUNG PLANTS

COMPLETE PROTECTION

Sylvitub is the perfect choice for protecting and nurturing your young plants in nurseries, reforestation or landscaping. It fulfils an essential dual function. Its honeycomb structure provides a strong barrier against external threats such as browsing by deer and rodents, bark stripping and natural abrasion. Simultaneously, its ventilation holes maintain an optimal balance of CO2, humidity, and temperature, fostering the health and resilience of young trees from their earliest stages of growth.

A PRACTICAL AND SUSTAINABLE SOLUTION

Lightweight and easy to install, the Sylvitub can be transported flat, which reduces logistics costs and facilitates on-site setup. Available in various heights, Sylvitub is a sustainable option for anyone seeking to protect their plants and ensure robust and healthy growth season after season.

MAIN FEATURES

GROWTH-ENHANCING
Growth-friendly microclimate thanks to its honeycomb structure and translucency

STAKES
Two notches or two pre-installed links for stakes
With feet

MATERIAL
UV-stabilised HDPE

SERVICE LIFE
Min. 7 years

- Straight cut possible as an option
- Translucent white colour optionally available

PROTECTRONC

STRETCHABLE SLEEVES FOR LONG-LASTING PROTECTION OF YOUNG TREES

EFFECTIVE PROTECTION FOR TREES AND SHRUBS

Protectronc protects your trees and shrubs against browsing and damage by wildlife. It is fitted onto a branchless trunk and prevents the growth of sucker plants. Thanks to its robust structure, it provides a reliable shield for young plants and promotes their development from the early stages of growth.

A SLEEVE THAT WILL GROW WITH YOUR PLANTS

Protectronc grows with your plant stock: it gradually expands as the tree grows. The holes in the sheath facilitate air circulation.

PRACTICAL AND DURABLE SOLUTION

Protectronc installation is simple and cost-effective; no additional stakes are required. Made of UV-stabilised HDPE, it has a service life of 4 to 5 years. Available in beige, it blends discreetly into the environment.

MAIN FEATURES

GROWTH-ENHANCING

Grows with the plant
Holes promote aeration of the trunk

STAKES

No additional stake required

MATERIAL

UV-stabilised HDPE

SERVICE LIFE

4 - 5 years (reusable)

PNF

SEMI-RIGID PROTECTIVE SLEEVE FOR HEALTHY AND PROTECTED GROWTH OF YOUNG TREES

OPTIMAL PROTECTION FOR YOUR STOCK OF PLANTS

The PNF (non-split protection) is the ideal compromise between net and tubing, offering your young tree plants reliable and long-lasting protection.

Constructed from anti-UV treated polyethylene, it provides effective protection against rodents, deer, and plant protection products. Its perforations enhance the airflow around the trunk.

PRACTICAL AND DURABLE

Lightweight and easy to install, our PNF sleeve is transported flat, reducing logistics costs. It also promotes the harmonious growth of the plant by gradually decomposing once the tree reaches its full size.

Available in Ø125 mm and lengths from 120 to 180 cm, it can be adjusted to the height of the plant, making it useful for different tree species and sizes.

MAIN FEATURES

GROWTH-ENHANCING

Perforations promoting ventilation of the trunk
Falls away naturally at maturity

STAKES

No additional stake required

MATERIAL

Anti-UV treated polyethylene

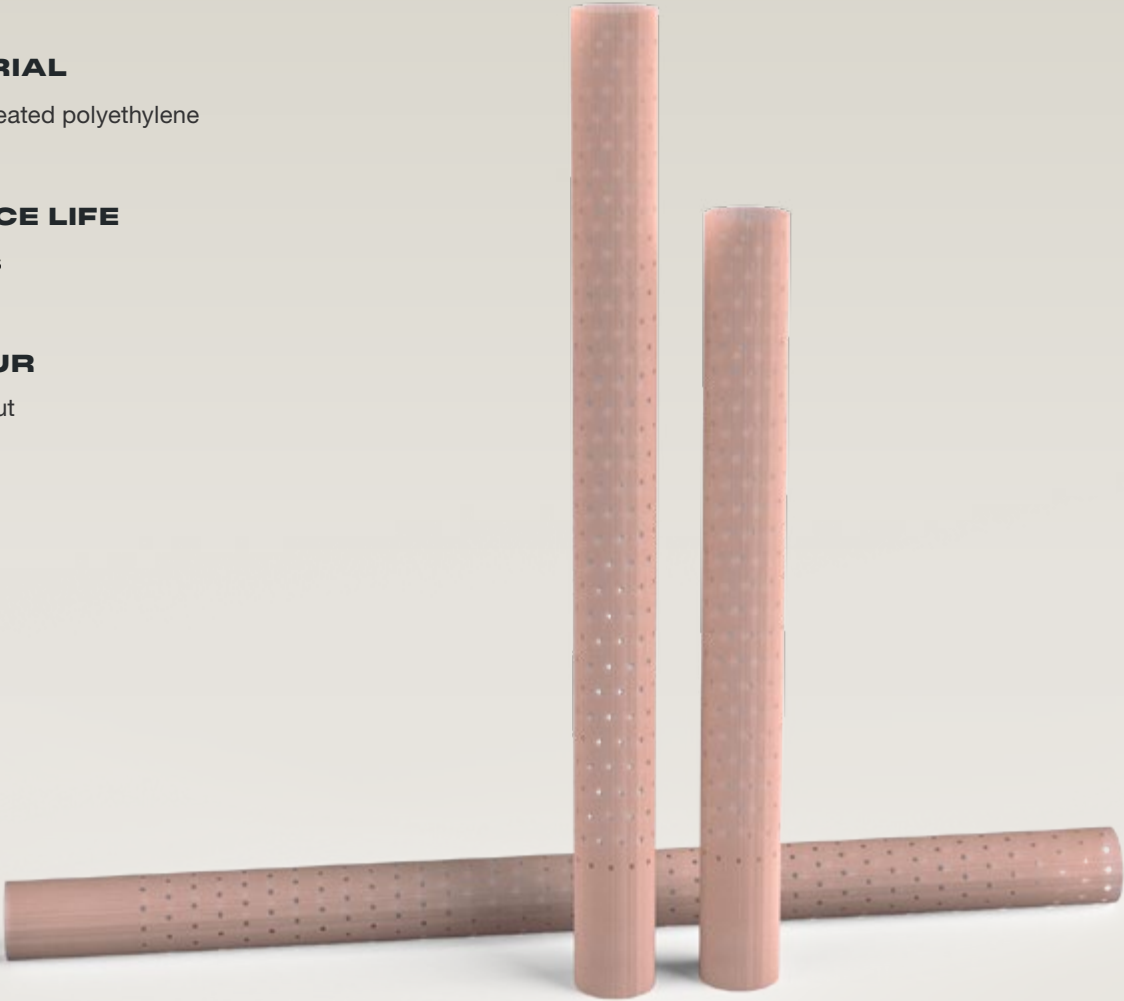

SERVICE LIFE

4 - 5 years
