Rev: 22 June 2023 2:34 pm

6 Remove dust

7 Install concrete screws 'Hinge' side.

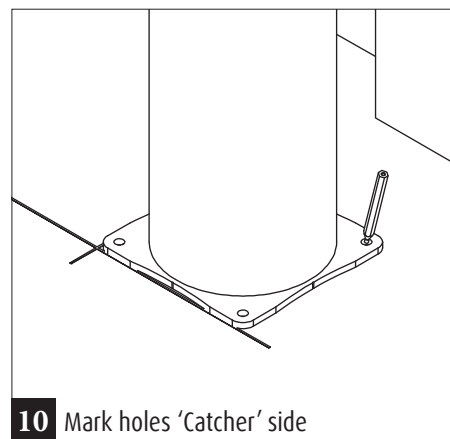

8 'Hinge' side done

9 Close the gate and make sure 'Catcher' side is in line with the 'Hinge' side. Adjust the 'Catcher' side if needed.

9' The bottom rail of the gate must lock into the metal pin of the 'Catcher' side. Adjust the 'Catcher' side if needed. Leave a 5-10 mm gap between the end of the lower rail and bracket.

10 Mark holes 'Catcher' side

11 Open the gate. Move 'Catcher' side, drill holes, remove dust and install concrete screws. See steps 5 to 7 for more information.
