ICE FLEX[®]

**SAFETY SOLUTIONS FOR
ULTRA-COLD ENVIRONMENTS**

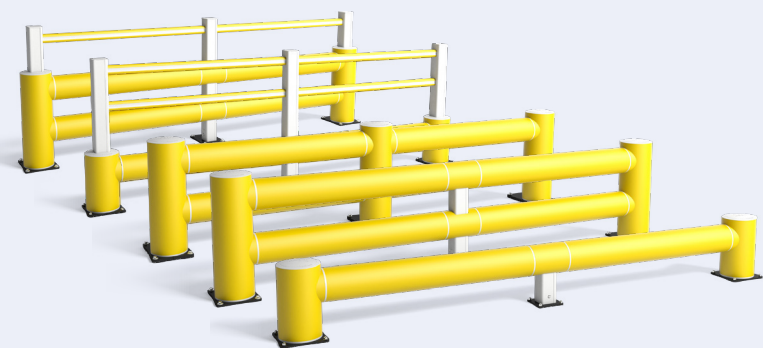

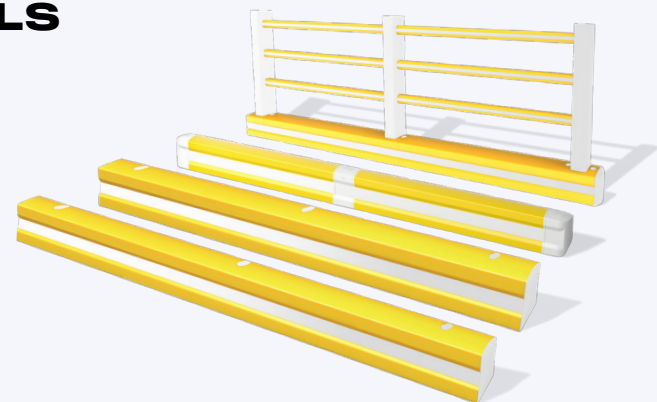

SAFETY SOLUTIONS FOR ULTRA-COLD ENVIRONMENTS

With the ICE FLEX® range, we offer safety solutions for use in sub-freezing temperatures down to -22°F. Our adapted Extrilene® and Rexilene® polymers ensure ICE FLEX® products deliver optimal impact protection and peak safety even in ultra-cold conditions.

ICE FLEX® SAFETY KICK RAILS

The ICE FLEX® safety kick rails offer full ground-level protection. The durable, innovative I-shaped rails absorb impacts ranging from 8.1 kJ (FLIP180B) to 17 kJ (FLIP200F). They're easy to install and compatible with other BOPLAN® safety products, like the TB 400 series. FLIP200F PLUS includes ergonomic safety handrails to protect people from forklifts. FLIP180L M offers modular ground-level protection. This type of kick rail can be adapted to corners and shapes, providing continuous protection for sandwich panels and/or insulation walls in large cold storage facilities.

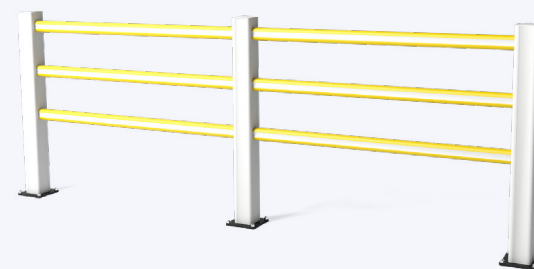

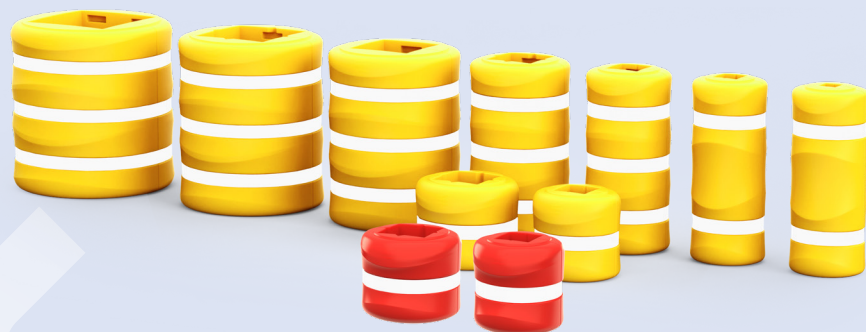

ICE FLEX® SAFETY BARRIERS

ICE FLEX® safety barriers shield people and infrastructure in ultra-cold environments, like cold storage facilities, from forklift impacts. They're an excellent solution for keeping designated routes clear, separating pedestrian traffic from vehicles. We offer various types of safety barriers that can also be combined with our other safety products.

ICE FLEX® COLUMN PROTECTION

Avoid costly structural damage to columns, pillars, and posts with our comprehensive ICE FLEX® column protection options. With excellent impact absorption, they minimize damage risk and maintain structural integrity. The most appropriate form of column protection with a wide range of diameters available can be installed even in extremely cold environments.

ICE FLEX® SAFETY HANDRAILS

ICE FLEX® HP PLUS safety handrail includes three rails and posts to protect pedestrians in high-traffic cold areas. HP PLUS 3 RAILS ensures the safety of pedestrians in such areas.

ICE FLEX® RACK PROTECTION

ICE FLEX® rack protection prevents damage to shelving and storage systems in industrial freezer environments. You can protect the ends of a rack with our RACK END. Wrap rack uprights with the innovative RACKBULL®. Snap them easily around the rack supports, fitting nearly all racking.

ICE FLEX® BOLLARDS

The ICE FLEX® BO200R bollard offers excellent collision protection in high-impact risk areas like access roads, gateways, and corners.

ICE FLEX® HEIGHT PROTECTION

The ICE FLEX® GOAL POST GP200B is a flexible height restrictor, protecting high gates, canopies, and bridges in cold storage areas from collisions with forklifts and other vehicles.

ICE FLEX®

More products in the ICE FLEX® range are available on request. Contact us. You can find our contact details on the back cover.
